

A Tribute to Mum

by Peter Lim

Given only a few days to live by her doctor last year, my mother survived mycoplasma attacks and recently celebrated her 92nd birthday!

My mum was attacked by mycoplasma last May. It attacked 81 areas of her body, including heart, brain and vital organs. She was suddenly confined to bed, unable to talk, eat nor drink. Her blood pressure kept falling to as low as 80/30 with fever up and down, to as low as 33. She was suffering, crying in pain with swollen limbs and joints and bloated stomach. All her organs were collapsing, and life was fast disappearing. She had two bad and smelly bedsores, 8cm tunnel deep, and full of pus discharge.

Imminent Death

Death was imminent. Her two personal doctors "abandoned her" to assist her death, with no food, water, medicine and wound dressings for more than a week. One of them added to our despair, "Your mum has only a few days to live" and repeated on two other occasions. She had severe fungal-ulcer attack in the mouth, right to the small intestines. Multiple sclerosis, microorganisms, bird flu, H1N1, dengue, parasites, allergies and toxins, all took turn to attack her weekly. She had sleep disorders, fatigue syndromes and energy loss, with adverse fever and blood pressure for four months.

Doctor on Board

Confronted by his nurse as "playing God" to let her die, the doctor returned and was surprised she was responding well with the support of NeB energy therapy.

He set up the feeding tube, dressed her bedsores with our organic Manuka Honey to kill parasites and bacteria, to help heal the wounds. No medications were given as he respected my desire to give her organic food and supplements to blend into liquid food with our Blendtec machine. Medications for high blood pressure and Parkinson's disease were stopped. Family members were so upset on the use of NeB as they don't believe that it could help in life threatening challenges, let alone on normal diseases.

Divine Understanding

I had no one to turn to. On bended knees, I wrestled like Jacob for divine guidance and deliverance. My

widowed at 42 when dad died one day after appendicitis surgery. Left with six schooling children, she took over dad's business with no basic training and education, to see us through. I was inspired by her determination, and it is my turn now to carry the torch.

Divine Breakthrough

Breakthrough came after four months when I realised the nurses, maid and visitors were passing the infections to mum. Visitors were restricted. All had to put on mask and wash their hands before seeing her. Nurses and maid were screened by remote, to stop work if affected. NeB patches and remote healing were intensified on mum's body and on

Tribute to Mum

To my mum, many mums have done well, but you are among the greatest! You taught me how to fight a good fight, to finish the race and to keep the faith. No wonder the doctor exclaimed "it is a miracle!"

experience was not good enough to save mum. All her organs had failed and it was impossible to restore them all. Hundreds of hours were spent on the computer to experiment on new programmes. Many times I wanted to give up in despair, seeing no answers to endless setbacks.

Mother's Love

Then I remembered mum's love. She stood by me and nursed me monthly when I was sick since birth. She breastfed me for four years when I was an underweight baby. She was

caregivers. The strategies paid off. In the last seven months, her condition remained stable without infection and began improving. She had a radiant look and put on weight. The swelling was gone, bedsores recovering, and good blood pressure control. There was no more sign of Parkinson's, and she just celebrated her 92nd birthday!

Love is Empowering

With worldwide pandemic infections, NeB can respond swiftly as otherwise many could die of infections. Hopefully, the world remembers mum for her contribution to NeB's research discoveries, to break through many boundaries and to help many.
