

# Cancer – A New Awakening

Don't just remove the tumours, remove the root causes! by Peter Lim

Ever since my cousin and a dedicated staff died of cancer when young, there is a burning desire to find a breakthrough. The insight must come from above to understand this cancer challenge. Twenty one years ago, Nature's Glory was founded and its logo speaks it all: "Man in Harmony with Nature, Attains a Glorious Health Stature!" The vision and answer of health are primarily found in nature, just like the wild animals have instinctively discovered.

We pioneered the organic and macrobiotic movements and later the Gerson Therapy. Nutrition and supplements are keys to recovery, but they are slow to face the speedy cancer challenge. We had many failures. The breakthrough came late last year to understand the complex mystery made simple to us from above, through our research in "energy medicine". We are amazed by the results which potentially meet answers to over 90% of health challenges. Twenty one years ago, we launched our unique chlorella, now researched for 60 years, and predicted then that colorectal cancer would be the leading cancer here.

## Get into the Root of the Problem

Our research shows that most cancers are due to pathogens and toxins arising from suppressed immune system and nutritional deficiencies. Pathogens include bacteria, viruses, fungi, allergies, and parasites. They attack the immune system, spread and attack up to 100 parts of the body! They form colonies within the tumours to thrive on the nutrients. As wolves in sheep's clothing, they coated themselves with fibrinogen glue to deceive the immune system that the tumours are "one of us".

If a rat comes into your house, do you keep on cleaning up the mess? No, you catch the rat to stop the mess! Same way, the pathogens and toxins cause the tumours. Should we remove the tumours or the root causes? If the parasites are all over the body, how do you expect to remove the tumours one by one without destroying life? If you remove by toxins, you will further weaken the helpless body that it could not even defend against colds infection, more so against the remaining cancer cells that are not killed. Many removed the tumours without even knowing the causes; and the tumours kept coming back because the root causes were not dealt with.

Removing cancer is a strategy to remove the root causes and build a strong immune system to counter the attacks. A wrong strategy could lead to tragedy and premature death! A male client had breast cancer and was operated to take out the breast and lymph nodes. He spent about \$200,000 on drugs and soon discovered he had prostate cancer as the meridian points are linked and now blocked. He did not make it. What more, in later years, the surgery parts that have blocked energy may surface into more tumours.

## Curing Cancer is an Art and Science

From our research, cancer occurrence is a systematic behavioural trend due mainly to pathogens and toxins, some even from birth. Remove acidity, toxins, and free radicals. Deprive food to tumour cells. Strip their external coating to wake up the immune system to attack. Strengthen good cells with healthy nutrients and oxygen. Attack the pathogens with higher energy levels than themselves to weaken, for them to retreat and die. When a person dies, the pathogens will leave the tumours as there is nothing to eat. So if we know how to deal with the pathogens and toxins, they will also leave the body.

There is no need to even remove the tumours unless they are really life threatening! They will subside naturally just like boils in our younger days! Herein lies the mystery of our "energy medicine" in our research to fight and win the battle. It is really amazing to see what we saw! We are going against the tide. With a positive spirit and an open mind, you will discover the truth, and the truth will surely set you free, for you to enjoy life and health more abundantly! You can remove one "beehive" but not hundreds of them in some cases, without endangering life!
