

Let there be Light

The answer to our cancer woes by Peter Lim

Over the years, many are searching for answers to the growing challenges of cancer. We understand in part and do in part, hoping that drugs, radiation, surgery, herbs, supplements and food could have the swift and effective answers. But many lives have been lost and many have died prematurely during the process as we are still groping in the dark.

But there is light into cancer answers as found in Genesis One, where wild animals have found the answers from the beginning as otherwise they would have more cancer cases than humans. This is the answer that has been proven right for at least 6,000 years, with the first 20 generations of mankind free from any diseases. Some lived up to almost 1,000 years!

Genesis One has been the compass of my research discoveries using food and energy as the extra mileage to health answers. All our organs are numbered with different energy frequencies for us to identify. All living things, including pathogens, tumours and toxins, have different energy frequencies too, to enable us to track in our research.

A Woman with Blood Cancer

This research into energy therapy has been my key success in meeting over 90% of health challenges relating to pathogens, tumours and toxins. Just last week, a young lady sought our help. She took drugs to treat her cervix cancer. The therapy was a success, but within two months, she was found to have bone and blood cancer. She still has her autism virus potentially since birth, which could have led her to the cervix cancer. Endometriosis and the uterus cysts are still there. Although the drugs were targeted at the cervix cancer,

yet the negative effects of cancer therapy have been found in the bones, with many key organs damaged. With a weakened immune system, she has infections of multiple sclerosis, arthritic virus, parasites, regular and H1N1 flu viruses, colds bacteria, allergies, mycoplasma, and toxins attacking her. The family was given the notice that she may not be able to make the grade.

Our Unique Energy Therapy

Unlike most therapies that target against cancer tumours, we target and track against the root causes of infections that weakened her body to cause her repeated cancer, which is worse than the first. The pathogens caused her healthy cells to turn cancerous, and it is most logical for us to target and remove the pathogens for unhealthy cells to return healthy. Within less than a week of our energy therapy, her immune level was increased to optimal 100%. All the damaged organs appeared to be restored, including pathogens and toxins to zero levels. Energy activities of endometriosis, uterus cysts and bone cancer were down by 40%, 100% and 50%, respectively. She was caught with a bacterial infection while in hospital and we swiftly removed the threat within two days. These results are very promising for her better chance of a long term recovery.

A Woman with 4th Stage Cancer

Another lady in her 40s came to our research centre for help last week. She

started with breast tumours and wanted the natural way of healing. She was on her way to recovery with strict healthy lifestyles, and thinking that more herbs and vitamins could clear her challenges. She was told of her liver enlargement and bleeding, and was given only a few months to live. I found she has cancer of the liver, lungs, breasts and cervix. Parasites were attacking her liver and lungs to cause her liver cirrhosis. Multiple sclerosis virus was attacking her breasts and uterus. Within less than a week of using patches and remote healing, all the pathogenic activities were gone. The tumour activities were down by 56%. We believe that she has a good chance of recovery.

Strategic Healing Recovery

In most cancer cases, the patients are gripped with fear and shock. They did not even know what causes the cancer. They got treated, and most of the time, the cancer is repeated and spread. It is time for us to consider a strategic healing recovery. We must know the root causes and treat them before any long term recovery can be achieved. Nature provides the answer. Our advice is to treat the root causes, and the tumours will usually disappear in time.
