

# The Secrets of Cancer Recovery

by Peter Lim

## Could this be one of the greatest health discoveries in the 21st Century?

**D**arkness looms when one is sentenced with cancer. Darkness of fear and uncertainties lie ahead! Will cancer spread? Am I going to die sooner than later? What would happen to my family and the plans that I have? What therapy should I choose? How sure is the therapy's success? In no time, most decisions are made without understanding. One moment the organs are intact, the next moment gone forever. Then more tumours are discovered and spreading, with on-going challenges. Meanwhile, pathogens thrive on the body's immune weakness, toxicities and nutritional deficiencies and take full control to rob one's life and health.

### Our NeB Research

Genesis One began with darkness and death. It was the light, life and energy that brought nature to life's goodness, balance, beauty and power. This revelation has inspired our NeB Research that energy is one of the key factors to restore life to good health again. We specialise on the research into pathogens, toxins and tumours which are the primary causes that make us sick and die prematurely. Scientists have studied their energy frequencies over hundreds of years to come up with breakthrough answers to defeat these pathogens by way of energy.

Originated from the US, our local NeB Research has uncovered one of the greatest health discoveries in the 21st Century in cancer breakthrough. We observed that pathogens thrive on toxins and weak immune system and are the eventual tumour builders. Once these workers are stopped, the tumour activities also stopped altogether. We proved our theory right by observing so many tumour cases by dealing against the forces of pathogenic infections and toxins. In most cases, the pathogens die within two weeks or earlier, and the tumour activities

also stopped altogether in quick time! But this recovery must be stabilised within the next three months to be sure of a potential recovery.

### NeB Energy Therapy Cases

In one case, a cancer patient was given two months to live with eight organs having tumours. In four days, we stopped the infections residing in the body and in the tumours. This man was in great pain and on high morphine dependency. On the 5th day, his dependency dropped by 80% and on the 10th day, 100%. There were no tumour readings in all his eight tumour organs after the fourth day and consistently throughout one month! Likewise, as we have seen in our NeB research studies in many of our recent cases, once the infections are stopped, the tumour activities stopped too, usually within two weeks or less. This has been possible through our NeB energy therapy that sends right frequencies to deal with the pathogens and toxins by remote, to remove the tumour threat and to restore organs to their healthy functions again, without losing or weakening the organs, using stem cell energies instead of introducing foreign cells. But if one allows free flow of infections into the body again, it is possible the tumour may return in no time, as what happened in one recent case. The pathogens re-attacked her breast, changing healthy cells to non-cancer tumour cells, which could lead to cancer cells again.

Our NeB Research covers non-invasive tests to find the root causes of cancer, distinguishing tumours from cancer and non-cancer, and distinguishing pain

inflammation, lumps, cysts, and cancer. A man showed his thigh tumour, which looked like 5cm. But he had only 0.5cm cancer with 0.5cm non-cancer, while 80% was due to pain inflammation, parasites, fungi, allergies, toxins, etc. In other words, only 10% could be cancer. One could calmly choose to remove the pathogens and toxins in quick time without sacrificing any part of the body unless it causes critical blockages. If this is proven right, a person dies not because of cancer but due to infections!

### Cancer Recovery, a Possibility

Our research shows that with energy therapy, organic food, supplements, healthy water and air, with lifestyle changes and balance in sleep, rest, food, water, air, exercise, bowel discipline and a positive spirit, the cancer recovery is for real. Some may even outlive those who have no threat! Could this NeB energy be one of the greatest health discoveries in the 21st Century on cancer recovery? It is you who could prove us right!
