

MSG, The Silent Destroyer

Bad effects of MSG, acidity, toxicity and obesity can be reduced by the Amazing Plum Balls that are able to improve health and the quality of life

By Peter Lim

MSG, The Health Destroyer

Have you wondered why some food can be so tasty yet leave you with "thirsty after effects"? Most food served in public areas are added with MSG, monosodium glutamate, to save cost and to enhance taste. It is believed that MSG is the silent destroyer that causes damage and disorders to the brain, reproductive organs, hormonal glands and the digestive and nervous systems.

It potentially leads to brain diseases like migraine headaches, Alzheimer's disease, multiple sclerosis of brain and spinal cord, strokes, Parkinson's disease and dementia. It destroys the hormonal systems including the thyroid, adrenal, pituitary, hypothalamus, pancreas, ovaries and testicles, leading to problems on metabolism, stress, moods, sleep, skin pigmentation, sexual drive, fertility and obesity. It leads to thickening of the blood and affects the optimal performance of the heart, kidneys and others. Undigested food can lead to toxic build-up, colon failure with body negative chain reactions and low energy.

The Power Of Plum Ball

Plum Ball is made from unripe plum that peaks in citric acid. It is an extract 30 times more potent than the fruit itself combined with wild Japanese Mountain Yam that aids in digestion. It is rich in organic acids and minerals which will lift your body in tip top condition. Rich in acids of citric, phosphoric, picric, catechin and pectin, they help promote vitality,

convert fat to energy, strengthen digestive and immune systems, and improve liver functions while protecting it from alcoholic toxicity.

Promotes Vitality And Beauty

Illnesses, drugs, poor eating habits, food additives and excessive consumption of meat and sugar can result in over production of lactic acid. It causes fatigue and muscle cramps. Metabolic activity turns sluggish. Food is not efficiently converted to energy, with cell ageing and obesity.

Citric acid in plum breaks down lactic acid into carbon dioxide and water and expels them from the body. Plum improves metabolism, prevents premature aging and converts fat into energy, and minimises the effects of MSG.

Guards Against Blood Acidity

Blood becomes acidic due to a build-up of lactic and other acids. This causes headaches, insomnia, irritability, hangovers and contributes to chronic ailments such as arthritis, rheumatism, diabetes, liver diseases, cancer and bone weakening. Plum helps to breakdown lactic acid and normalise the blood pH. Plum concentrate is 500 times more powerful than oranges to neutralise sugar in the blood.

Strengthens Digestive System

Plum contains catechin acid which kills unfriendly germs in the intestines, speeds up intestinal peristalsis and acts as a

laxative for a healthy digestive system. It is also for de-worming and relieving flatulence, constipation, diarrhoea and food poisoning. In case of food poisoning, take 30 plum balls after food, with 20 every 2 hours for adults, and reduce half a dosage for children.

Improves Liver Function

Plum contains picric acid which helps the liver neutralise toxins efficiently while contributing to overall well-being.

Strengthens Immune System

Plum boosts the body's natural healing power and improves resistance to common viral infections such as colds, flus, coughs, and sore throat. It contains benzoaldehyde which relieves fever and pain.

Rich in Calcium, Iron and Phosphorous

Pregnant women, growing children, the elderly and the anaemic suffering from arthritis and rheumatism need extra calcium and phosphorous. Plum is a natural source.

Promotes Calcium Absorption

Plum's high content of citric acid increases calcium and iron absorption. It is ideal for pregnant women and growing fetuses.

Nature's Glory Plum Ball is exceptionally unique from Japan. It contains no added artificial citric acid which makes it more sour while comprising its high nutritional value.
