

Our Organic Stand

Our challenge to enhance organic integrity for good health

With increasing health challenges, organic products are one of the better answers to promote healthy living. They are free of harmful pesticides, fungicides, herbicides, preservatives, additives and chemicals. Being free from any genetic modifications (GM), organic products are spared from the known ill effects of GM - abnormal growth and toxicity in the human body. Also, better soil nutrient for organic food has proven to have higher nutrients and better taste than conventional ones.

The price of organic products is usually two or more times than that of conventional. With the rapid organic movement and many experiencing a turn for better health, many believe organic food and products would contribute to their long-term good health.

However, there is a lot of confusion these days regarding the integrity of organic products. Some claim their products to be organic, even if in reality they have very insignificant organic elements, or take advantage in deceiving the product origins to command better values and recognition, even claiming to be certified by recognised bodies when in fact they are not.

Our organic pioneering stand

Nature's Glory is among the earliest organic pioneers since 17 years ago. The discovery was accidental due to my poor health condition and I was able to relate organic food grown in the wild for animals, which have no hospital or medical cares. The revelation transformed my health within three

months and with supplements, I was able to enjoy good health for the last 20 years without the need of medications, which contrasted greatly to my first 45 years of total medical dependence. This changed my profession for a fuller mission in life. Hence, Nature's Glory was founded to discover the best of nature for mankind.

Our facilities are organic-certified

Nature's Glory has been recently certified by the National Association for Sustainable Agriculture (Australia) Ltd (NASAA) for having the facilities to import, repack, distribute and sales of certified organic produce. Being as one of the stringent organic bodies in Australia and a member of the prestigious body, International Federation of Organic Agriculture Movements (IFOAM), this certification by NASAA confirms that our organic products are checked for quality and safety by strict standards.

Our organic philosophy and pride of excellence

We share our organic philosophy even before being certified:

- No fumigation or chemicals are allowed at our premises for the last 17 years, using only natural controls.
- No GM food as it is not good and safe enough even though accepted by some organic bodies. Therefore, we hardly import products from countries associated with GMF unless the certifications include non-GMO (GM organism).
- No GMF nutrient as compose, including waste from animals consuming GMF, as they can pollute

the soil and the produce we eat, with potential hormonal and antibiotic harm.

- No same products are sold for both organic and non-organic.
- Only from reputable organic sources.
- Only self-cargo clearance from port, especially for the fresh produce, to prevent any product manipulations.
- Label organic products accordingly as certified organic, conversion certified, organic biodynamic, or as pesticide-free.
- Label the country of origin accurately to prevent ambiguity.
- Pay more for China beans with Japanese direct presence and control to safeguard our organic quality.
- Full disclosure of ingredients, especially in most toiletries that have serious toxic elements hidden as "organic".
- Driven not by profit mission but by passion of health mission and vision to promote the quality of life, health and body harmony.

The organic health legacy

Nature's Glory has earned the reputation of passion and pride in organic integrity and excellence. Health is an asset to the family and the nation, and as a legacy for future generations. Above all, our prices are most moderate for you to embrace the organic vision!

Nature's Glory - The Name You Trust for Health.
