

Chlorella Growth Factor

The Secrets to Immunity, Recovery & Beauty

By Mr. Peter Lim

What is CGF?

CGF extract is a hot water extract from chlorella, a fresh water green algae. It contains nucleotide-peptide, glycoprotein, nucleic acid-polysaccharides and sulphur, with anti-cancer properties for the body's DNA and RNA. Scientists discovered it as a powerful enhancer of immunity and growth development to the young, and to retard aging.

What are the health benefits of CGF?

One key distinctive function of CGF is immunity. CGF prevents virus from growing, increases body's resistance against infection of diseases and also controls cancer cells. CGF helps stimulate tissue and genetic material repairs, protect and support cellular functions and integrity, improve nutrient intake, regulate enzyme production, restore energy, protect cells against toxins, and improve bowel function and memory.

It was reported that CGF helps lower blood pressure, improve liver function, increase blood and platelet counts (good for dengue fever and blood cancer), regulate blood sugar, renew cells, quicken healing of stomach ulcer and skin disorders, heal anaemia, remove constipation and headache, resist cold, and restore appetite.

How does CGF increase immunity?

CGF stimulates T cells against viruses and cancer, B cells against bacteria, and macrophages against cancer, foreign protein and chemicals. CGF stimulates interferon production, macrophages, secretion of tumour necrosis factor (TNF) and fibroblast activity. It enhances the activity of Natural Killer (NK) cells, slows down the ageing process, and extends the life of mice by over 30%.

How does CGF increase blood count and cell renewal?

Chlorella has asexual reproduction system, dividing into four cells daily through photosynthesis. Theoretically, it can grow so energetically to cover the whole earth in 63 days! Chlorella cell is almost the same size as the human red blood corpuscle, with nucleic acids that help our DNA and RNA. Dr Saito confirmed his clinical studies of

Chlorella Growth Factor (CGF) is a gift of life, generating new, active and healthy cells. It is good for growing up children, adults and senior citizens, healthy or sick, and for mothers, before and after delivery. It is especially good since nucleic acids of our cells and growth factor are slowing down after early twenties, and affecting our ageing process and skin complexion.

chlorella on gamma ray and antibiotics to patients that it prevented white blood cell reduction and improved blood count and recovery.

Does chlorella tablet have CGF and other nutrients?

Yes, chlorella tablets and powder have up to 25% CGF provided the cultivation is outdoor, as important nutrients from indoor are reduced to almost half. Quality and potency of CGF depends on the quality of chlorella and the filtration of impurities.

Chlorella is distinguished for its chlorophyll, cell walls and CGF. Highest in chlorophyll among greens, it is good for blood cleansing, anti-oxidation and cancer treatment (healthy blood carries oxygen and nutrients to build healthy cells). Cell walls stimulate interferon, bind dioxin and toxins, and promote peristaltic movements. Besides, chlorella is rich in antioxidants, beta carotene, vitamins C, E, K and B, especially B12. Minerals include iron, calcium, magnesium and potassium, with 65 percent protein, carbohydrates, and essential amino acids, for body's optimum health.

It is good to take both CGF extract and chlorella as a whole food.

Why are Yaeyama Chlorella and CGF extract so special?

Yaeyama is among the world's authority and pioneer in chlorella. Its chlorella is grown outdoor in one of two world-renowned coral reef islands in Japan, with clean, coral reef-mineral water, excellent weather and unspoiled nature. It prides itself as among the best and highest in chlorophyll, CGF, digestibility, 100 percent purity, high nutritive values and excellent taste and based on ISO9001-HACCP standards. Potency of our CGF extract is outstanding due to the exceptional chlorella quality. A bottle of 720ml contains very high level of 25 percent CGF, with balance in glucose, fructose, honey, oligosaccharides, vitamin C, and malic acid, but no other preservatives or additives. Visit our website at www.natures-glory.com and search for CGF on why our CGF potency is so special.
