

Using Energy (Qi) to root out the health causes!

By Mr. Peter Lim

Many look for treatment answers to their health symptoms but do not solve them permanently. The wisest way is to solve the root causes to put an end to the endless sufferings. Over 90 per cent of diseases are due to pathogens, toxins and tumours. They cause imbalance to our body cells and functions, making us sick. Energising the body cells is the key to boost immune system to fight off the infection.

Organic food has higher energy levels

Organic food is free of pesticides, chemicals, additives, preservatives and genetic modifications (GM) which are commonly found in non-organic or conventional food. Studies confirmed these toxicities are linked to conditions such as cancer, infertility, foetal abnormalities, chronic fatigue syndrome, skin problems, Parkinson's disease and many degenerative diseases. Food additives and preservatives are also believed to cause a range of health problems such as allergies, headaches, asthma, growth retardation and hyperactivity.

Studies revealed that GM food can cause abnormal growth, disorders and allergies. It is commonly found in corn, soybean, potatoes and tomatoes used in pizza, chips, soda, infant formula, ice cream, cookies, vitamins and candies.

Studies also revealed that non-organic food contains less nutrients, antioxidants, vitamins and minerals. Together with toxicities and genetic modifications, this food can cause a potential reduction in the immune system to allow attacking pathogens to cause diseases. It is good sense to turn to organic food for body to restore to good health since it has higher energy (Qi) levels in nutrients and less toxicity.

Cancer challenge

Based on our studies here and the proprietary research in the United States for the last 20 years, we discovered that all cancer patients must have environmental toxins and biofilms (microorganism plaques), fasciolopsis buski parasite (large flat worm) or viruses in the body. If any factor is absent in the body, there is no good reason to have cancer. This discovery is important as some had been known to be operated and even went for chemo when there was no such evidence. If the tumours are removed without knowing and removing the root causes, the cancer can later appear in other parts of the body, since cancer cycle takes up to 12 years to mature. Since the main cause of cancer is environmental toxins including from food, it does not make any good sense to add toxins in our treatments to perpetuate the health problems. Also,

since not all the cancer cells are killed by chemo and with most healthy organs destroyed in the process, the remaining cancer cells can deal a fatal blow to the body which may not even respond to infection.

Autism challenge

Our studies confirmed that autism mainly arises from R1H2 virus which is usually present in the mother's womb and passes on to the unborn child. It attacks the brain of the male, while attacking the girl's uterus and reaching her brain during teenage or young adulthood, to create health havoc and imbalance, and many suffer without knowing the root cause. In some cases, it attacks the girl's brain even at a young age. It causes anxiety, memory loss and depression while destroying the brain cells. We could trace the link to the mother and father and sometimes to the earlier generations as long as the virus is in the mother's womb. Vaccinations, mercury or heavy metals are not the root causes but could trigger the virus to react. It is not genetic but viral and the same is usually present in Parkinson's disease cases. Counselling is good but this virus must be dealt with to be effective. It takes up to six months to remove the virus and up to two years to help repair the brain cells in our technology.

Herpes challenge

We discovered that herpes virus usually lodges in the brain and travel down the spinal cord, potentially causing anxieties, headaches, painful skin sores, shingles, low energy, and leading to complications of brain and liver damage, blindness, and even cervical cancer, and can pass on to the baby during childbirth.

Pre-diabetic challenge

We could trace virus in the pancreas, bone marrow and eyes, with blood coagulation to alert a pre-diabetic condition, many years even before the diabetes happens.

Fungal, allergy and bone viral challenges

Our studies showed that fungal and allergy spores could attack the brain, ear, nose, intestines and bones to cause sleep disorders, anxiety, memory loss, prolonged cough, pain, headache or migraine, head instability, depression

and low energy. Even osteoarthritis and osteoporosis could be traced to viral attacks and not just lack of calcium, nerve or bone pain. A lady in South Korea was hospitalised for six weeks due to depression and sleep disorders with pain all over. She had suicidal tendency and refused to eat and given mental pills. We discovered she had fungus in her brain and lungs, with environmental toxins and biofilms. Within a week after our programme, she was discharged with good appetite and positive spirit. One woman was operated in the small and large intestines. We discovered it was just allergic spores and could be removed within sixty days through energy management!

Pre-pregnancy challenge

All parents would like to have their children born healthy but this is not always the case in these days. A wise mother wanted a third child and asked to be tested on her organ energy levels.

Eighty percent of her organs failed and it is not really fair, right and wise for the mother's health problems to be passed on to the unborn child. One way to prevent the birth of an autistic child is to put on our programmes throughout the pregnancy. They could help the mother and child to overcome most of the health challenges with less drug dependence.

Truth shall prevail and set you free

Many have been helped through our NeB technology with the booster patches programmed to specific needs. They serve as a complementary therapy to energise the cells on 24/7, for the immune system to effectively function to heal by itself. It helps the old and young, even the babies. Using digital photos which are non-invasive, our proprietary technology could determine the root causes and answers. Many serious cases have been helped. It benefits those who believe!
