

# Stress, Anxieties, Depression (SAD) & Sleep Disorders

By Peter Lim

Are you among the many that have SAD, sleep disorders and pain in your brain and/or body? Do you want a more permanent answer to your problems? Are you opened to new technologies to resolve your health challenges effectively? If your answer is yes, be inspired by the many cases here that have transformed their lives...

## **Attack by fungus**

A Korean lady in her sixties suffered mental disorders for seven years. She had pain all over that caused her to have SAD, leading to breakdown of her body, mind and spirit. She was on mental pills not knowing she had fungal attacks. While hospitalised in Korea for eight weeks, her photo was sent for our analysis.

Her root causes were fungal attacks in the pituitary gland, cerebellum, lungs, and toxins in her intestines, and biofilms (microorganisms) in various parts of her body. Within a week of using our energy booster patches, she was discharged. Within a month she was enjoying life with nature to the fullest with good spirit, without medications and pain.

## **Attack by parasites**

A lady in her thirties with two young children suffered sleep disorders, low energy, cold hands and dizziness. She was analysed to have serious parasitic attacks in her cerebellum, cerebrum, pancreas, adrenal gland, intestines, bladder and heart. Biofilms were in many places including lungs, affecting circulation. Part of her memory brain cells was damaged.

Within a month she responded well to our energy patch healing, and within four months, she had almost full recovery. Her timely response saved her from potential attack of fasciolopsis buski parasite which could lead to cancer.

## **Attack by R1H2 (autistic virus)**

A lady in her thirties suffered dizziness, migraines, sleep disorders, shortness of breath, heart palpitation and inflamed

stomach. Her photo was analysed to have R1H2 autistic virus lodged in the brain and uterus. She has memory loss and biofilms in many places. Her heart palpitation is due to prolapse. The virus affected her children. It will take up to six months to remove the virus and another two years to rebuild the brain. She is on the way to good recovery.

A teenage boy suffered severe migraines, dizziness, stress, sleep disorders, distorted vision, acne and sinus since birth, with poor appetite. He is on mental depression pills and wanted to end his life. He did not know his root problems until he discovered us.

He has very high R1H2 virus lodged in the cerebellum with high stress levels, allergies in the intestines, environmental toxins in the kidneys, and parasites that caused acne. Within two weeks, he responded well with our energy and holistic healing, with a transformed positive personality.

## **Attack by bacteria**

A lady in her forties complained of chest pain, numbness, headache, sleep disorders, passing out gas often, with circulation difficulties. She was found to have bacterial attacks in her cerebrum and intestines, intestinal allergies and acid reflux. She had biofilms in many places including her brain and heart. After five months, a photo retest was analysed and found that all her major ailments had gone.

## **Attack by herpes virus**

A man in his forties had sleep disorders for 3 years, pain in his shoulder, sweat while sleep, low libido, and memory loss,

with enlarged vascular veins in the testicles. He was surprised that we found the herpes virus lodged in his spinal cord that caused his woes. Within a month, he was responding well to our energy booster patches and on the way to good recovery.

## **Why the responses are so swift**

Like tracing the cause of health challenges to genetic cells, we study the energy levels of diseases for the last 20 years. Over 90 per cent of diseases are due to pathogens of bacteria, fungi, viruses, parasites, allergies, toxins or tumours. These weaken our immune system to destroy our body energy balance.

Our energy booster patches attached to the skin 24/7, are programmed to boost the body's immune system to optimal energy level for it to deal with the challenges and heal the body by itself. The innovation comes from the synergetic technologies of nano, homeo, aura, quantum physics and stem cells, to serve as a complementary support. The cases above are part of our ongoing research in Singapore.

A good sound sleep is very important to health. Sleep disorders could affect the health of the heart, brain, liver, kidneys, eyes, and sex and other organs, affecting energy and concentration. Prolonged stress and anxieties lead to depression and immune system breakdown with increased aging process. Give our technology a try to potentially set you free, and confirm the many that are experiencing good recovery. Persist with patience to achieve! Be happy and not SAD.
