

# 21st Birthday!

## 21 Glorious Years of Health Mission

By Peter Lim

What a joy to celebrate our 21 glorious years of health service to the nation and the world in our nation's 47th birthday! It started with a vision from above to change the landscape of health care services. (I had 45 years of monthly medications since birth!). The logo of Nature's Glory speaks it all: "Man in Harmony with Nature, Attains a Glorious Health Stature!" The vision and answers are in nature!

### Pioneering health mission

21 years ago we pioneered the organic and macrobiotic movements, and later the Gerson Therapy. Insects know that pesticides, chemicals and genetic modified food could kill them when they eat. They got smart and refuse to eat. Also chemicals weaken the veggies, fruits and meat to weaken our immune system to fall sick.

### Solve the roots, not the symptoms

After my cousin and a dedicated staff died of cancer when young, there is a burning desire to find a breakthrough. Food is key but slow and we had much failure in our research. The breakthrough came last year and inspired from above, to understand the complex mystery made simple to us through "energy medicine". We are amazed by the results which potentially meet answers to over 90% of health challenges.

Identify the root causes that cause the tumours and the symptoms. Remove the roots and the symptoms will usually go away. Strengthen rather than suppress the immune defence system to fight and potentially win the battle. If a rat comes into your house, do you keep on cleaning up the mess? You catch the rat to stop the mess! Many clients came. They heard. They saw. They talked. They believed. Most got well.

### Singapore, highest in health, least in debt burden

We need the animal instinct to keep ourselves healthy. Laws need to be dynamic to liberalise information of health discoveries from nature. Many will be better informed, health equipped, for quality of life and health, for better productivity that outweighs economic gains. Singapore could be the first in the world with the highest quality of health and productivity, but with the least health debt burden if we know how.

### Every precious head counts

We are an aging population with declining births and every healthy head count is important to contribute to economic health and wealth. Producing children these days is a great challenge. Producing unhealthy children and having miscarriages or unable to give birth, is a great stress. The roots must be traced! Likewise, most elderly including in mental and health care centres need to be transformed to be productive. Every family takes pride to contribute to the growth and health of the nation.

### Nature's Glory salutes

Nature's Glory congratulates the nation's birthday to be One People with love, passion and vision for the nation. The vision of the authorities in building bond of families and people with mutual respect is highly commendable. Singapore is a blessed country with unseen hands protecting us. It is important for us to do things right to prosper our generations. Nature's Glory thanks all principals, clients and authorities for their trust and support to make our vision comes true, for healthier and happier lives ahead.

## Dynamic & Strategic Research into pathogens, toxins, tumours and products to Enhance Quality of Life.

Certified Organic Food

Bio-Good Mushroom Extract (Japan)

Chlorella/CGF Extract (Japan)

Plum Balls (Japan)

Omega 3 Guaranteed 85% (Japan)
