GMO, Cow's and Coconut Milk

Non-organic soybeans are mostly genetically modified these days, contrary to nature. The seeds are usually embedded with herbicides and pesticides to keep pests away, killing wildlife and beneficial bacteria in the soil, and resulting in super weeds with more herbicides in the plants. This means potentially high doses of toxins in our bodies, leading to the breakdown of our immune systems. These days, many diseases are too severe for our immune system to handle, and drug resistant. Say "No" to GMO soybeans and insist they are properly labelled, otherwise avoid them!

Non-organic cow's milk is mostly from cows fed with GMO foods, with growth hormones and antibiotics, and may result in allergies. These carry potential diseases to humans which could affect our health.

Coconut milk has health benefits but the saturated fat content causes weight gain, high cholesterol that hardens and blocks arteries, and possible allergies.

- Made from certified organic, non-GMO soybeans, free from harmful pesticides
- Unique, original and superb taste with bacterial-soy skin removed
- No added sugar – sweetened with natural tapioca syrup
- No enzyme inhibitor commonly found in home-cooked soymilk and soymilk from public places. (Improperly cooked soy is linked to poor digestion, enlargements in pancreas and thyroid.)
- Pasteurised with nutrients boosted with Hatomugi Pearl Barley (known to strengthen the stomach, aid digestion, stimulate urine flow, and good for menopause, among many health benefits)
- Iodine-free sea salt is used in place of Kombu seaweed powder for those mainly dependent on dairy products. (Those non-allergic to iodine can add Kombu seaweed powder, which is high in iodine for healthy functions of thyroid, breast, brain, gastro-intestine, as well as for healthy pregnancy and newborn.)
- Exceptionally rich and thick soy, as a healthier substitute to cow's and coconut milk
- Ideal for smoothies, shakes, breakfast cereals, bread, custards, cakes, desserts, noodle soups, curry, laksa, spicy food and others
- Recommended by leading baristas for the perfect soy latté or chai latté in place of GMO cow's milk (with growing popularity in cafés, restaurants and hotels for a healthier diet)
- Easy to serve and can be taken cold or hot. Take Bonsoy daily for your family's good health and complexion.

Turn to organic **Bonsoy** for a healthier choice!

Manufactured in Japan for

Regional Distributor

Nature's Glory Pte Ltd

315 Outram Road #11-03 Tan Boon Liat Building, Singapore 169074
