

# Artery Blocks

## Potential to Heart Attacks & Strokes Road to Recovery Naturally

By Peter Lim

### How Arteries Are Blocked

Arteries are part of the circulatory system which blood carries oxygen and nutrients throughout the body. Arterial plaques and calcifications could arise due to deposits of calcium, cellular wastes, cholesterol, fats and wastes that cause arteries and blood vessels to harden and narrow over time. Once this happens, blood clots and the blocking of blood flow in our body occur. Blocked vessels leading to the heart can cause heart attacks, while brain blockage can lead to stroke. Blockage to the limbs can affect mobility, leading to gangrene.

Factors causing blocked arteries could be due to high fat concentration in the blood, hypertension, diabetes, hormones from stress, smoking, genetic effects, immune system deficiencies and high bad cholesterol with low good cholesterol. Brain disorders and migraines (usually from pathogenic attacks) could also lead to heart attacks and strokes. Diseases of the circulatory system include aortic aneurysm, angina, arrhythmia, atherosclerosis, high blood pressure and peripheral vascular disease. **Many are unaware that their system is blocked.** If discovery comes too late, there could be serious organ damage that could even be fatal. Even the young are not spared. Sound quality sleep can help improve the health of brain, heart and organs.

### Breakthrough In Energy Therapy

Conventional treatments usually involve open surgery or stent implants, short and medium terms unless the root challenges are identified and lifestyles changed. Treatments could be costly and may endanger the lives of some.

In our 20-year research studies using energy patch therapy, we have very good results in removing the blockages. This therapy is more affordable and not at all life

threatening. The Qi therapy in the energy booster patches, left on 24/7, helps clear blocked passages within 3 months. Improvements are often seen within the first month in our local research. Once cleared, we use stem cell energy patches to repair the organ damage without using foreign cells that might not agree with the body. We see this as a breakthrough when minds are opened to new scientific discoveries. Many, including top executives are coming forward to realise these benefits. It is good to protect yourself from future attacks using this Qi therapy-discovery.

Free screening tests by appointment can be done to alert you of your potential health challenges for timely remedial actions. Some are unaware of health problems they might be suffering from. Through our Qi therapy, we help you ride over these challenges with energy, food, water, air, supplements and lifestyle changes. Cases from abroad are being helped without their presence, by sending photos to us for analysis.

### Local Case Studies

**Study 1:** A man in mid-twenties has very high level of autistic viral attack in his brain since birth. The virus caused him fits, migraines, high artery blocks and stress. Using the energy patches, it was confirmed within three months that his artery blocks were reduced by 100%, virus by 76%, stress by 53%, whilst the strength of his immune system was increased by 50%.

**Study 2:** A man in his fifties suffering from high blood pressure, cholesterol and migraines, often complained of tiredness and numbness. He had two strokes within three years and a heart attack with four heart stents two years ago. His root problems were traced to the autistic virus since birth. I warned him of another heart attack soon but our therapy takes about 3 months. In the first month, he suffered his second heart attack and was found that two of the heart stents were 75% blocked

while the other two, 50%. He went through an operation for his two arteries and is responding very well to our energy therapy.

**Study 3:** For 20 years, a lady in mid-fifties suffered giddiness, viral attacks and vision loss. She recovered after 3 years but started to suffer giddiness, nausea, tiredness, palpitation, depression, anxiety and high cholesterol once more 10 years ago. Her dad passed away due to heart attack, and her brother also suffered from heart attack. She was in "panic hysteria" when she first saw me. We found she had very high level of artery blocks and diabetes. Within a month she was responding well on her circulation and by the third month, she was sleeping better, and on the road to recovery.

**Study 4:** A lady in her late fifties could not sleep well for nearly 20 years. She often woke up in the middle of her sleep, was easily tired and experienced numbness in her limbs. She had 2 operations to remove her endometriosis, with skin disorder since young and had shoulder aches. We found she had high artery blocks and allergies on her skin. Within just a month of patch therapy, the numbness in her fingers and limbs had reduced a lot. She sleeps so much better now. She was so pleased and introduced her sisters and others to us, all who have benefitted from the treatments.

**Study 5:** A top executive in his late fifties had been taking medications including for blood thinning and cholesterol for his artery blocks. He had stiffness and numbness in his fingers, was often tired, low in energy, sleep deprived and he had his polyps removed. We found he had very high artery blocks in spite of his medication. He was unaware of the bacterial attacks and damage to his kidneys and colon. Within a month of our therapy, he noticed marked improvement, slept better and introduced many top executives who went through our treatments and are seeing improvement in their health.
