

Sleeping woes

Know the root causes

By Peter Lim

A sound sleep is very important to health. Sleep disorders could affect the health of the heart, brain, liver, kidneys, eyes, sex and other organs, affecting loss of memory, vision, focus and energy. Prolonged sleeping woes lead to stress, anxieties, depression, ageing and immune system breakdown.

The key to solve sleeping woes is to deal with the root causes rather than using sleeping pills and pain killers. Such temporary measures may lead to irreparable damage to the organs.

Know the root causes

Attack by parasites

A lady in her late 30s saw me last month. She was in great distress, in severe migraine pain and not able to sleep for three days in spite of taking sleeping pills. A month ago, she had high fever, vomiting, diarrhea, followed by daily migraines. She had pain at her shoulder and neck, pain and numbness in the limbs, weak heart, breathlessness and constipation. Earlier, she had MRI checks and found nothing. We found she had parasites attacking her cerebrum and lymph nodes that caused such great distress, insomnia with brain damage. Within three days of using our NeB, Nano Energy Booster patch therapy, she slept well and thereafter. And the pain was almost gone with restored energy.

Attack by fungus

A South Korean lady in her early 60s was a seven-year mental patient and hospitalised for eight weeks at the time when she sent her photo for our health

analysis. She was in pain all over, with migraines, sleep disorders and low energy. She was depressed with no desire to eat or live. We found she had fungal attacks in her pituitary gland, cerebellum, lungs, and toxins in her intestines, with microorganism in the brain, liver, bladder and blood. Within one week after using the NeB patches, she was discharged from the hospital and within a month, she was totally transformed, with good energy and sleep habits.

Attack by autistic virus

A man in his early 50s did not know he had the autistic virus R1H2 lodged in his brain since birth. He suffered severe migraine attacks, sleep disorders, low energy, stomach upset and acid reflux. He had two strokes and two heart attacks within three and two years, respectively. We found the root causes to be the autistic virus, narrowing his blood vessels, causing the strokes and heart attacks in spite of four heart stents planted two years ago. With the NeB patches, we help removed the arterial blocks and got rid of the virus. He was back to good health and sleep after repairing his brain, sex organ, kidneys and heart with our energy stem patches.

Attack by bacteria

A lady in mid-30s had migraines for 20 years. She had sleep disorders, mood swings and depression. She had pain all over, with urinary tract infection, vaginal

itch, monthly colds and runny nose. These affected her family and social life and she gave up her professional career. We found she had high bacterial level in her cerebellum, causing pain, and stress and organ disorders. Within four months, she recovered and was back at work.

Attack by hormonal imbalance

A lady in her early 40s had hypothyroidism which affected her sleep disorders for 10 years. She often had colds and stuffy nose, palpitation, low energy, heavy metal deposits, and anxieties over her kids. Her liver, lungs, kidneys and urinary bladder were all affected. With NeB, we cleared most of her woes within 4 months.

Attacks by other factors

Mycoplasma, Epstein Barr Virus, H1N1, menopause, persistent cough, stress and anxieties, and late coffee/tea drinks could also cause sleeping woes. We dealt with countless cases and provide effective answers to all sleeping challenges with no side effects, in quick time, with permanent solutions on a 24/7 basis.

Fix an appointment for a free consultation and meridian test to fix your sleeping woes and other health challenges. Life will never be the same with NeB, together with food, supplements and life style changes! You will be amazed by what NeB can do for you.
