# COUGH & SORE THROAT

**(The power of healing) By Peter Lim**

*Are you one of those with repeated coughs and sore throats in recent times? Traditionally we use antibiotics, medicines or syrups but some have side effects. Are you looking for effective ways to deal with them without any side effects? One of the secrets lies in the power of energy healing therapy or "medicine"...*

## Introduction

In recent times, many are experiencing repeated coughs and sore-throats. Medication seems to be a temporary solution.

To deal with these challenges more effectively, we need to know the root causes. There are acute and chronic coughs that lasted within and more than 3 weeks respectively. Some are infectious while others are not. Coughs could be due to pathogens, toxins or environmental irritants. Pathogens could come from parasites, fungi, bacteria, viruses and allergies. Environment factors include cigarette smoke, pollen, dust, chemicals and particulate matters from vehicles, haze and factories. Sore throats are usually linked to bacteria or viruses.

## The power of energy healing

All these factors cause an imbalance to the energy levels of our body and organs, especially when our suppressed immune system is not able to respond to the challenges. The secret of overcoming lies in restoring the immune system to fight off the threats.

The use of energy therapy or "medicine" is very unique and effective to meet these challenges. For years, we have researched on Nano Energy Boosters (NeB), a magnetic patch therapy containing signature frequencies to deal with specific health challenges, to help increase the immune system and to harmonise the body energy levels to optimal equilibrium. Within hours or days of use, the challenge is dealt with but with no side effects. The patch is usually placed on the left upper back or front of the body on 24/7 basis, and replaced within 2 to 3 days depending on the severity. It

can also be placed on the chest or throat if the challenges are there.

Below are some of the programmes you can safely use:

- Bacteria patch covers most bacteria including the common colds, strep, staph, bronchitis, pneumonia, TB, e-coli, dysentery, cholera, gingivitis, etc.
- Flu patch covers most of the regular flu viruses excluding H1N1 in the Advance Flu patch.
- Other patches cover fungi, allergies, toxins, herpes, mycoplasma, and Epstein Barr virus.

Choosing the right programmes help determine the success.

## Other therapies

Apart from patches, Serumi Air Filter is an excellent, portable machine producing negative cluster ion, distinguished to deal with airborne pathogens and pollutants, especially good for those with lung diseases and skin disorders and for better sleep. It received a merit award from the World Science Council. Umeboshi or salted plum soaked in hot water is good for cough and phlegm, and those affected with "no voice". Plum Balls deal with bacterial and viral threats, indigestion, nausea, vomiting and diarrhea. Juicing brown onion with green apples can help to clear aggressive phlegm, but not for those with weak hearts. So are lotus roots.

## Case studies

A lady in her late fifties was coughing for 8 months. Medications and antibiotics seemed to be no help. The long cough could lead to irreparable damage as she came from an asthmatic family. Our tests confirmed she had bacteria, hormone and

circulation problems, besides allergies that triggered her cough. Using the NeB patches, she recovered in quick time.

A lady in her sixties was treated as mental for 7 years. She was hospitalised for 8 weeks when she sought our help. She had sleep disorders with low energy, cough, depression, and pain, with no desire to eat or live. We found she had high fungal levels in her brain, pituitary gland and lungs. Within a week of using NeB, she was discharged from the hospital. Within a month, she fully recovered and was totally transformed.

A lady in her sixties was warned of her lung condition 2 years ago. She did not pay attention and recently was told she had 4th stage lung cancer and spreading. She was coughing and we found that she has parasites lodged in her lungs but with no evidence of cancer. She is undergoing our NeB therapy plus supplementations and juicing.

A lady in her fifties had repeated coughs for 2 months. Twice she had lymphoma within 6 years and went through chemotherapy. We found her cough is due to the high parasite level in her lungs. We found she has high environmental toxins in her liver, lymph nodes and breast, the evidence of a potential repeat cancer. She is under NeB therapy plus supplementations.
