

# Research Background of Nano Energy Booster System

Dr. RH, creator of Nano Energy Booster System, has been involved in healthcare for the last 30 years. In the last 15 years he worked in the field of homeopathy and homeopathic pharmacology. He designed over 50 OTC homeopathic and herbal products. He has been researching human energy fields for over a decade. This complex and time consuming research project led to the creation of 33 energetic therapies known as Nano Energy Booster System.

All energy patterns are measurable. Dr. RH worked with thousands of people with degenerative diseases and health challenges. He also worked with many people in the state of abundant health. He was able to find out that there are specific orderly energy patterns that are present in healthy people and that are depleted or are completely missing in sick people.

Fritz Albert Popp made one of the greatest discoveries in science; he discovered that every chemical action in the body or outside the body is preceded by a specific energetic message. Dr. Popp created equipment to measure this energy in the human body. He called these bursts of energy or light that can communicate with all cells in the body “bio-photons.” For this discovery, he was nominated for the Nobel Prize.

We know that we can measure energy patterns, we can identify depleted energy patterns and we can restore these patterns. This is what our new technology is about. There are two directions of energetic medicine:

1. To stimulate a response from the body.
2. To identify lack of energy that is supposed to be there.

When we look at young children we see an abundance of this large spectrum of energy, we see health, happiness, resistance to disease. We live in the world that has become very toxic, we live in a society that has pushed the speed of life, the speed of our perceptions to absolute limit, we live in stress, have mental and physical trauma occurring to us almost on a daily basis. Because of this our protective energies, the energies that a child has, start getting depleted. We are looking at Nature to find these specific energetic patterns that are present in healthy bodies, in foods and dietary supplements. We take these specific energies and put them back into the body using Nano Energy Booster Technology.

We can find out what particular frequencies (energy patterns) are depleted long before any disease symptoms manifest. We can restore the natural energy patterns and stop the process of disease development completely. We don't look at toxicity. We look for reduction in healthy patterns. I could't tell you the frequency of mercury, or lead, or amalgam filling. I don't invest my time looking for toxicity. I'm looking for very

specific energies that are gone. Two people with the same health problem will have the same energy patterns missing or very depleted. Our Nano Energy Booster System allows bringing back these energies to what is considered a normal level – the level found in healthy people. Once we regain those energy patterns in sick people we observe an improvement in symptoms, regaining of health.

An interesting thing about healing is that it is not something we go for into the future. It is a process of restoration. We go for healing into the past. Healing is not a forward motion. It is actually time reversed.

Nano Energy Booster Technology is the 21<sup>st</sup> century method of energy delivery to the body. A booster is a field of energy. The nano boosters are non-Transdermal. They are made of metalised material. We determine and burn particular frequency patterns into the booster just like a software programme is burnt on a CD. Our primary goal is to introduce frequencies only beneficial for the body. We don't programme any frequencies into the booster that don't normally occur in an abundantly healthy person.

In our new technology we have taken the concept of homeopathy – energy medicine – and we expanded it to the 21<sup>st</sup> century product. We eliminated pills, capsules and have a delivery system of a pure energy field. The body absorbs the energy like a dry sponge absorbs water because this energy is supposed to be there.

We can see how the booster works using new technology of digital aura camera photography. We take an aura photo, then put on a booster, wait for 3 minutes and take another picture. We see the energy fields completely change. In one case we see that the auric field extended by 6 inches when a booster was introduced into the field. The glow becomes very dense in colour, creating a shield. We see enriched deeper, denser colours. The booster creates a surge of energy for the body to absorb. It is not going into the body; the body is resonating back and forth with it. We have actual aura photographs and videos that show how this is actually occurring. It is a nebulous process because the energy is invisible but with the new technologies today we can see energy – we can see it change colour, hue, shape. We have the tools to show and visually prove these things.

Energy used to be a very mysterious substance. Today it is no more mysterious than the wind that blows the sails of a boat. We can see energy, measure it, analyse it and work with it. The equipment “Interactive Aura Station” also interacts with all energy centres of the body and gives a 22 page report. We can do a lot of research and testing with this equipment. It is also available for practitioners.

The technology seems simple but it took us 15 years to come up with 22 therapies. The wonderful fact about the human body is that it knows what it needs and it constantly asks for it. The energy patterns of our 22 therapies are all found in abundantly healthy people. They are not foreign to the body, they are supposed to be there and as soon as the body comes in contact with that energy it embraces it. All we do is introduce the booster into the energy field of the body. The body reaches for these frequencies and grabs them, if it needs them.

The nano boosters don't have side effects. Side effects are associated with synthetic substances, such as pharmaceuticals. We are using normal natural frequencies. When the body needs them, it absorbs them. If the body doesn't need a frequency, it just circulates in an energetic pattern.

The beauty of our nano energy products is obvious results. This summer I spoke at the conference at the University of Ohio. There was an unusual flu outbreak there in July. I offered flu nano boosters to some people who were affected so badly they didn't think they would be able to attend or speak. They all showed up the next day and all spoke of tremendous improvements they experienced within 6-12 hours of wearing a booster. Almost all flu symptoms were gone.

Our programmes were so intensely researched to create a quick massive benefit for the user; most people don't doubt the booster is working for them. The frequencies of flu virus are in a very narrow range. We studied and defined very specific frequencies for influenza virus. It is a pattern of energy that becomes depleted and allows the virus to come in. Once the frequency is restored, the body's resistance goes up to normal.

Our body attracts and pulls the energy on the left side, so we recommend that the booster is placed on the left shoulder. The body can absorb 100% of energy from the booster. When the booster is placed on the right shoulder the body will absorb 75% of available energy.

A standard EAV testing device used for testing supplements can be used to test nano boosters. We have developed special test cards that can be used with test plates. This practitioner places a booster on the test plate and takes readings from the client and identifies which therapy is beneficial for him/her based on the scores. The order form lists nano boosters in alphabetical order. The cards are in alphabetical order too. I use a yellow highlighter and mark the therapies that are necessary for the client. It is a fast and efficient system. You can test for all therapies in 15 minutes, in 30 minutes the patient will be ready to get started on the programmes.

You can also use test cards with SCIO. We have a practitioner in Phoenix, Arizona who uses an EAV device called Biotron that looks like a box with a large metre on the front. It is easy for practitioner to use and easy for the client to see the readings. They offer a two day training session that explains the equipment.

Compliance is very high as there is no need for pills, bottles, timing, no need to take medication to work, etc. All they need is to place the booster on the left shoulder and leave it there for 3 days.

We are using a mild hypoallergenic adhesive on the booster to hold it in place. It will stay for up to 3 days. If the skin is oily it may come off sooner but we don't want to use too strong adhesive so as not to irritate the skin. You can keep it on while taking he shower or you can reinforce it with a surgical tape or a Band-Aid for the remaining days. A 10-pack of nano boosters is a 30 day supply.

All frequencies in all 22 programmes are perfectly balanced. These are energetics that are totally accepted by the body. You can do 2-3 programmes without overwhelming a patient with energy. The nano boosters are very powerful. People may experience the benefits almost immediately. The results are very recognisable. If they use too many programmes, they may feel discomfort. When you do the test and assign the therapy use the triage method – start with the two that are most essential and then move down and complete the therapy.

Nano Energy Booster System is a convenient solution for gaining and maintaining health. It is a total restoration programme. We are restoring the wonderful energies that you find in those with abundant health. We've met with many wonderful therapists, naturopaths, MD's. So many people today are interested in pursuing more natural remedies, energetic interventions and we are very pleased with the way our line of nano boosters has been used. Some people report 100% effectiveness of therapies.

Patients love them and comply.

We are a Research and Development company. We introduced our first products to the public 3 years ago. These are the devices designed to EMRs – electro magnetic radiation that comes from TVs, computer monitors, cell phones, etc.

Today we are offering a system of 25 energetic therapies called Nano Energy Booster System and we also have two unique products based on the same principles – Gas Chip and Insulation Factor IF -500 chip. We cover these two products at the end of the interview.

### **Sleep Support**

65% of population is sleep deprived. The latest studies show that if you lose an hour of sleep you actually have to make up for it to catch up. We are under so much stress and we have so many personal, social and business obligations that most people are 6 hours of sleep behind on Saturday. There is no way they can make it up sleeping late on Saturday.

Our Sleep Support Booster is designed to reconstruct the natural sleep cycle and reestablish the natural sleep patterns.

It works in three phases.

The first stage activates the sleep cycle. We find depletion of energy in the pineal gland that produces the hormone called melatonin. All sleep deprived people always have a reduction in this energy pattern. When we place this energy back into the field, the pineal gland responds to it.

In 1997 we identified very specific frequencies that occur in the brain that increase the coping skills for stress and anxiety. We placed these frequencies into the second phase of the booster.

Correct rest for healing and regeneration of the body happens in theta and delta sleep. If your body can get to that stage, it starts the natural process of healing. We identified the exact frequencies that occur in the human brain during theta and delta sleep cycle and placed them into the third phase of the booster.

So to sum it up, the booster helps you start the normal flow of hormone that begins your sleep cycle. The next step is the release of energy that supports your coping skills for stress and anxiety – the things that keep you awake at night. The third phase introduces the frequencies of theta and delta sleep into the field and helps to get your body into healing sleep.

Sleep Support is the greatest healing booster you will ever use. It is so comfortable. When you sleep, you are getting very whimsical dreams. It feels like getting under your favourite down comforter and hugging it. It makes you so comfortable and so relaxed. You will get a great night's sleep. If you want to try out one booster first try our Sleep Support. You will know that it works. Put it on before bedtime; peel it off in the morning when you wake up. You will feel awake and alert within 5 minutes or stick it into the inner pillow case where you lay your head.

Some people will put on Energy/Stamina booster to jolt them to action but most people won't need it after a good night sleep. You need to use the programme for only 5 days to reestablish the sleep cycle. You may have to repeat the programme after travel and changing time zones.

### **Energy and Stamina Support**

This is an important and effective booster as most people get out of pep in the afternoon. It gives the second wind to the body. We are studying athletes for improved stamina. Lack of energy is a big problem – there are over 100 thousand accidents each year caused by drivers falling asleep at the wheel. Alcohol related accidents are on the second place.

If I am driving somewhere at night for over 45 minutes I put on this booster to make sure I don't fall asleep. It is great for truck drivers, taxi drivers, etc. When truck drivers use caffeine and ephedra products they can't relax and get proper rest when they reach their destination because they are revved up by chemicals. When they use Energy and Stamina booster, its effect goes away 5 minutes after they take off the booster.

### **Stress Less Support**

We were working in an alternative medical hospital. Eighty percent of their patients were cancer patients, severe cancer patients. All of them were given a death sentence. They were told that they had only so many months to live.

But what we found interesting was that only 20% of these people were diagnosed by physicians to be clinically depressed. It was actually the same % as with general public. Eighty percent of these people had fine coping skills and didn't fall into the state of depression. We found it very interesting and started taking a close look at the energetics of what's happening in these people's minds. We discovered very specific frequencies that increase the person's coping skills for stress, anxiety and depression. We identified these and at that time we were picking up a viral signature while doing brain scans. I talked to my psychiatrist friend who thought I was crazy because there was not such a thing as a virus that causes depression. He thought it was ridiculous

I came up with this idea working in the US and 3-4 years later I found out about the research that was done in Germany by a group of research scientists who discovered a Borna virus that invades the brain and causes depression. This research occurred exactly at the time when I made this discovery in the other side of the world.

We identified a particular energy pattern that doesn't let this virus in and also increases the brain's ability to cope with stress, anxiety and depression. Every time we work with a person who is diagnosed with clinical depression or anxiety there is always that particular ranges of frequencies missing or depleted. We never see otherwise. Our lives have become so stressful and it really robs the quality of our lives. This is a booster I use a lot myself, I am even wearing it now, during this interview.

Most of our discoveries are based upon practical needs. When problems present themselves we look at them and say "I bet a lot of people have this problem. We can help. This is how the following two discoveries were made.

### **Circulation Support**

We have been working on this programme since 1996 studying people with such circulatory problems as plaques, calcifications, high cholesterol that lead to strokes and heart attacks. It is pretty common to see calcification in the arteries, kidneys and bladder. We have seen aggressive calcification on the teeth as well . We learned with a group of cardiologists who did bypass surgeries and provided actual arteries with plaque and calcification for our studies. We studied them for 3 years and established the energetics of circulatory problems. We then created a Circulation booster designed to introduce the energies that will gradually dissolve blockages and calcifications. We have seen decline in plaque and cholesterol after a 90 day programme. It is a gradual process.

### **Comfort and Pain Support**

We all have little headaches, aches and pains from time to time. The booster is designed to create a higher level of comfort at the time of occasional pain. There are specific frequencies for trauma – whether it is a car accident or a surgical procedure, both is trauma, emotional and physical.

Now we are studying migraine headaches and our booster may be effective for that. With time we'll frequencies for spinal cord injuries.

### **Joint Comfort Support**

A lot of research went into this booster. We worked with three different groups with enlarged painful joints. The worst case is rheumatoid arthritis. We also looked at osteoarthritis, and osteoporosis. We even had a few people with Pageant's disease.

These diseases developed years after they lose the energy in a particular area. We were able to identify very specific energy patterns related to bones, tissue and connective tissue. Even though it is not a product for arthritis, people with arthritis noticed tremendous change when they started using this booster.

We usually suggest 30 days and measurable results can be reached. A 60 day programme may turn around and give them pain relief and hope – in many cases the progression of the problem can be really stopped. It can be used with a pain relief booster too.

### **Scar Tissue Support**

We work with many acupuncturists and naturopaths who work with meridian therapy. One of the problems we found is that many people have scars from accidents, surgeries, etc. When they use needles or electric stimulation they find it hard to open blockages created by scar tissue. Scar Tissue booster is one of the things we can use for this problem.

Also if a patient is scheduled for a surgery and they use this booster before and after they will find that they have less scarring.

One of the largest problems plastic surgeons see is the problem when they do breast implants/augmentation. After 4-5 years a severe amount of scar tissue forms in the heart. It pushes the implant down and disfigures the breast. This booster will pretty much stop any scar tissue from forming there. When we talk about storing energy – where can we store it? What is one of the best places to store energy? In water. When you look at Earth as a biosphere, the whole Earth is covered by salt water. Salt water has created a thriving environment on this planet. One of the very best places to store energy is salt water or saline.

Scar tissue booster can literally be placed on each breast and it will emit the energy into saline implant and store it there. Any woman who has breast implants can energise the actual saline inside the implant and pretty much prevent scarring from happening. It created an energetic barrier that will not allow the scar tissue to form.

We are working with several plastic surgeons now who consider it a part of their normal progress to energise the saline to make sure they can avoid scar tissue later on.

Re-surgery for a patient is a very traumatic process because they have to burn that scar tissue away. Even the burning itself leads to more scarring. It is a kind of vicious circle. We never planned this product to be used in this capacity. When we were made aware of this problem we said that we had the solution for that.

### **Female Hormone Support**

We talked to lots of ladies because they are Doctor Moms, always interested in helping their families. They always have a lot of comments and give us definite research directions. PMS, bloating, hot flashes always come up; there is a lot of interest and questions about our weight loss programme. So we put a lot of time and energy into these particular programmes.

We found the energetics that have to do with female hormones – estrogen, progesterone, and by inducing stronger denser energetic field we have observed the reduction in bloating, reduction in discomfort and pain. They seem to get through their menstrual cycle easier. We feel really proud of this programme as it works really well. Hot flashes stopped or subsided, overall feeling better.

Does it work together with the weight loss programme? They work together just fine but the programmes are very different. Our weight management programme is the most complex programme that we have.

### **Male Hormone Support**

We've looked at men who have strong, abundantly active lives. We see very specific patterns of energy that relate to hormones. We identified frequencies of saw palmetto that is largely used in Europe for prostate enlargement. We have our goal to help men not to have their prostate enlarged. We have that energy there that is used by the prostate and keep that gland smaller. We noticed that these men have more interest in their sexual life, stronger, better erections, produce more semen. There are multiple benefits to this booster. It is best to wear it for 24 hours ahead of sexual activity for better interest and better arousal. Men will look forward to their sexual activities.

### **Ideal Beauty Support**

We've designed this booster primarily for female clients. We looked at some German studies on frequencies for prettier skin and better hair. So we've come up with our take on these frequencies and then included all the frequencies from German studies. The skin gets better, tighter, retains moisture better.

This is a cosmetic product. A practitioner could check and see if the client could use it along with the weight loss booster.

## **Weight Management Support**

We tried to do a multi-faceted approach to weight management. If you really want to lose weight you need to follow a whole system. You must reduce caloric input and increase physical activity. Every successful weight loss programme involves that.

How can we make it easier? That was our goal. We identified the frequencies of five different fat burners. We obtained actual fat tissue-animal and human fat tissue that we got from our plastic surgeon friends who extracted it with liposuction. We put that tissue in a box in the lab and ran five different frequencies. We saw the fat literally dissolve, break down and liquefy.

These are the frequencies we are adding into the field.

In addition to that we must detoxify the body. When we take in toxins from our food and our environment they are stored in our fat cells. The body is trying to move those toxins away from the organs and fat is a nice place to store it. When you start to break these fats down, you start reintroducing toxins into the body. So we have created a very strong detoxification process and included energies to stimulate the lymphatic system and move out the toxins in a natural way. This is a huge programme that includes 38 or 39 frequencies. Everything in it is good for you. It reduces appetite, after a couple of months you will find yourself eating much less. As you start getting lighter, you become more active, you feel good about yourself. You also get much more mental stamina, becoming more creative, and enjoy new physical activities. This programme attacks several situations from different angles.

My mom will be 90 in February 2006. She was very active, walked on the treadmill but then she injured her knee and had some pain in the sciatic nerve. She finally had a back surgery and they corrected the pinched nerve but she had to be in a wheelchair. In the time of several months she gained weight and it was difficult to come back from that.

I started her on a weight loss programme four months ago and she lost 22 pounds, is out of her wheelchair and is doing her daily walking. At 90 years old it is very difficult to come out of these things and I am very proud of her and of myself because I was able to give her something to get out of this situation.

In this weight loss programme we have stayed away from stimulants. Programmes with stimulants may work well for 30 to 60 days. Then the body starts rejecting all the stimulation and there are negative effects of all this stimulation. You can use our booster continuously for 90 days. If they want to continue the programme they can resume it in two weeks. We have seen good results in people with thyroid problems who lost weight and were able to reduce their medications. Of course, you have to work with your doctor on that.

## **Longevity Support**

Baby boomers over 50 years old like me are concerned about aging. We started looking at what the science is doing about aging. We see the use of HGH. About 12 years ago New England Journal of medicine came up with the first official study of using HGH with adults. Prior to that, it was used only for children with dwarfism.

This time they gave men aged around 75 years old two injections of HGH per week for a period of 6 months. At the end of 6 months these men were lean, muscular, well defined and they looked like they regressed in age by 20 years. Pretty impressive! We've identified frequencies of HGH, DHEA, testosterone, and progesterone - hormones that make you feel alive and young. We placed these into our Longevity programme. People have a nice response to it. They feel more energetic, they seem to become more physically active. They look and they feel younger.

## **Eye Support**

I first started looking at cataracts (opaque densities that form in the lens inside the eyes) because one of my close friends is an ophthalmologist and occasionally I would scrub with him and assist him in surgery. So I witnessed and was a part of a lot of surgeries.

When my dad developed cataracts I told him that we would go to my friend and he will take care of it. And this is what happened.

However, several years later my mother started developing cataracts. She asked me if I could do something to make her eyes better. It was a challenge and I started studying and finding patients and clients from different offices who were experiencing this problem. We call them mature "cataracts." When they get to the certain point of visual reduction, they take them out and replace the lens with a little plastic lens.

We looked for a long time and finally found and identified a particular band of energy missing in all people who developed this particular eye condition. A few years ago we put this energy into a homeopathic tablets and I sent it to my mom. Six months later she went to her doctor. He thought that he would do a surgery. Instead the new associate who saw her told her: "You have the eyes that are twenty years younger than you." She said: "What about my cataracts?" He said "You don't have any cataracts."

That gives us the first spark of interest in working with visual problems. Since that time we identified frequencies related to eye pressure, retinal problems and created a pretty all-encompassing system for the eyes.

I use it for my floaters – we identified the frequency that breaks them up and disperse them. Our eye nano boosters are pretty well, an all inclusive programme for healthy eyes. The programme length varies according to needs. I can see a difference in my floater in just a couple of days. You can see them breaking up and getting smaller,

becoming less prevalent. It varies to different people. We are only restoring the energy to the levels found in people who have very healthy eyes. We are not trying to do anything for eye diseases. We are restoring energy patterns related to that part of the body. So far it is working very well.

### **Memory Support**

We looked in several different places to see what has been used to improve memory. And what people talk about. We found Gingko Biloba to be a good produce for enhancing the memory. The problem we found is that the potency of that herb is very low. Even if you are taking Gingko Biloba you usually don't experience a tremendous gain in memory because it is too weak.

So we went to Europe to see what they were doing over there. In Europe they use a product called acetyl l-carnitine. We found that it has exactly the same frequency as Gingko Biloba. It is an amino acid, a protein compound that is five times stronger than Gingko Biloba.

We started from that and also studied a group of people to identify where the energy is depleted in the field. People who had memory problems were much depleted in that frequency. We placed that frequency into the booster and it fills that void. Usually you see the difference the first day you wear it.

There is a lot interest in this product and we sell a lot of it. We haven't had availability of Alzheimer's groups or the opportunity to do much research. We hope that the large medical groups we are working with will start giving us data so that we can improve and expand this and other products. We are a Research and Development company; we don't really market and sell things. We are now providing these products to practitioners who see patients/clients and make determinations – whether they diagnose an illness or test and treat for lack of energy. We are trying to make the very best products we can make. It is important to get a feedback from the people who are actually seeing the patients. We are very open for feedback and want to encourage you to give us feedback on the use of these products.

### **Organ Cleanse Support**

Many people who develop health challenges face pH problems. – their body becomes very acidic. They usually have reduced lymphatic function. They usually face inflammation in multiple organs and locations of the body. Most of these issues come down to good organ maintenance. We created a programme that created an energy field that works with all organs of the body, harmonises them so that they work together correctly. It is probably one of the best programmes we have because whenever a person presents themselves at your office, they usually have some of the problems that this particular therapy takes care of.

What you are going to find as you start energetically testing people, is that this may be the very first programme you'll work with.

It helps detoxify the body and cleanse out the environmental toxins. We've tested this programme with 79 environmental toxins like mercury, arsenic, lead, formaldehyde, etc, these are the substances that accumulate and stay in the human body. So we have to have a formal system to cleanse the organs and this is the first step in taking people back to the healthy pathway. Anyone who has been plagued with health problems who decides to take control of their health should start with this programme first.

### **Enzyme Support**

This booster creates a field of energy found in enzymes that are lost in cooking. We consume food but may not get the energetic message for proper absorption. Diabetics have digestive absorption problems. The 30 day programme stimulates and corrects digestive process. We have seen people with blood sugar levels of 150 – 160 who get it down into 100s within 30 days using this booster. A potential diabetic will see normalisation of all processes associated with this condition.

### **Colds Support**

When developing this programme, we looked at most common bacteria – staph infection, strep, throat, e-coli, salmonella, and pneumonia. We identified whole fields and ranges of depleted energetics in people who get lots of infections. A strong energy in anti-bacterial frequencies creates a strong barrier against infections. This booster contains a large array of energies that keep you healthy and protect you from getting a cold. We are restoring missing links in the energy fields of the body and by doing this we are restoring homeostasis. The fields we restore resist the bacterial infestation of the body.

### **Flu Support**

The symptoms of flu and cold are often intertwined so you don't know if you are experiencing flu or a bacterial infection. Colds booster is geared to energetics associated with bacteria. The flu booster is based on interaction of a different set of energetics – viral. If you are experiencing flu, you will see results in as soon as 12 hours. If you don't get results, most likely you are dealing with a bacterial infection and you need to switch over to colds booster. Practitioners can use their testing equipment to determine the correct booster to use.

### **Candida Support**

This is a programme against yeast and fungus. We created an energetic barrier that creates an environment that can't support Candida any more. Usually a 30 day

programme is sufficient. It works for vaginal yeast as well. Candida booster can be used in combination with Parasite booster that will tackle even worms that may live in our bodies. We encourage people to eat salads, fruits, vegetables but they may not be washed properly. So people may swallow eggs of parasites that will hatch in the warm-moist internal environment and create infestations.

### **Parasite Support**

We studied several types of homeopathic remedies used against parasites, found 6 specific patterns and we programme into the Parasite booster. If our bodies have these specific energies they don't allow parasites into the body. With the help of these energies we create a barrier to stop them. In general medicine it has become a very strategic practice to use toxic substances to kill things in the body. My friend, a podiatrist, complained to me that he had patients with serious fungal infection in their feet. He had to use toxic medications and monitor their white blood cell counts to make sure that he didn't kill the patients while trying to alleviate the fungal infections. I don't see the need for that as long as we can restore all vital energies of the body and have the system that can maintain germ-free environment naturally.

### **OLE Support**

We worked with the company that developed the original EverClear product in 1997-98. The product targets herpes virus. The original product was created when a particular strain of fungus was accidentally discovered by their lab.

They discovered that this specific fungus was always present around the herpes outbreak site. They developed a natural product that has energetics against herpes simplex virus and also a barrier that can't be tolerated by the fungus.

We are told that herpes is incurable as when an antiviral medication is introduced with the virus hiding inside the fungus. The EverClear people were the first ones to realise that herpes has a fungal host. Thousands of people were able to get relief from outbreaks. The booster replicates these energies. A person can do a 90 day programme. It stops an outbreak abroad as soon as the booster is placed on the body. If there is a reoccurrence they can do a 7 day programme to strengthen the energetic barrier. The name of the programme is now changed to OLE Support.

### **Gasoline Support**

As we talked before, each chemical reaction is preceded by energetic message. So we decided to look at fuel as fuel is organic and it isn't a far stretch from the organic composition of the body. So we assumed that the same principle will work for gas. We bought different grades of gas; regular, plus, premium, put the samples into test tubes and started studying their qualities. At that time I lived in San Diego where gas prices are

especially high as there is only one pipe that takes gas to San Diego. I found out that all gas stations sold the same gas, only Shell used one kind of additives, Chevron another, etc. They all have their own premium additives that increase octane and gasoline performance.

We found the frequencies of performance additives and included them into the energetic message of the booster. We see better burn, better mileage, and better gas economy.

We are changing the subtle frequencies of gas, leading to subtle changes in gas structure, in the combustion process. There is no danger in doing this. Several university studies and government studies proved the safety of this technology.

We also turned off the energetic message of pollution and smog. The “side effects” of the booster – the fuel burns cleaner, carbon deposits are gradually melting away. We started our testing with large tractor-trailer trucks.

Their fumes started smelling like French fries. The fume smells go away as toxicity is reduced. The exhaust smells like warm water and warm air. Within 15 minutes the pollution and smog output are reduced by at least 46%. The engine runs more efficiently. The longer the booster stays on the vehicle, the better the engine performs. We suggest the person changes oil after 1000 miles of using the booster as it gets all the impurities from the engine drop into the oil. The used oil can be thick and really black.

### **Insulation Factor**

I bought a house but I didn't check the neighbourhood as closely as I should have. I found that I moved into the neighbourhood of yuppies like me who have teenagers with loud cars, trucks, motorcycles. My house is right on the corner so everyone who comes into our subdivision slows down and speeds up in front of my house. I realised that I made a mistake in buying a house there. I also realised how expensive it is to cool the home in the desert. On the East Coast they have another challenge – to keep the house warm in cold weather.

The main loss of heat or warm air is through the windows. I have R-factor windows that are insulated. We decided to create a microchip that would improve the insulation of the windows. It is tiny – ½ inch in diameter. You just place it on the window pane. It presents all insulation frequencies into the glass itself and then into the gas between the panes. The actual gas in the windows becomes denser and becomes a better insulator. Once I put all the seals on all windows - and it only took me 20 minutes to do that - 3 -4 minutes after I put them on I couldn't hear people talking in the street any more.

We did some tests in sound studios and found that the chip increases the sound proofing of the glass by 78%. The thermal insulation factor is increased by about 20%. We put it on the windows where the energy moved into the glass first, then into the natural gas, usually krypton or argon.

After 3 days I noticed the quietness in the house. It was strange and unusual. So I pulled out my equipment and started testing and measuring the energy coming out of it. I looked at the energy coming out of the walls. It turned out that because the energy “didn’t know any better” it filled up the window and then traveled down the walls. We’ve got wood, sheetrock, insulation and stucco. These are all pretty much natural fibers and they absorb the energy too. It took about 3 days for the energy to meet with the next field of energy. After 3 days all the walls, all the windows in the exterior of the house became completely saturated with that energy and it was emitting from the walls.

It is a very cool product. Now I have this quiet comfortable home. Plus we are in the desert where we get 30-50 miles per hour winds at night. I’ve got huge palm trees in my yard; they are clashing and beating on the walls. It gets very noisy. A young couple next door likes to party late every two weeks and the noise from all this doesn’t come in and doesn’t bother me anymore.

We looked at the insulation factors and found that they have some of the same frequencies found in flame-retardant materials. We even checked out tiles from the space shuttle and found that the frequencies that help to shield the spacecraft from the heat.

This is a great benefit as the flame retardant frequencies can give extra 20 minutes of protection for your house if your neighbour’s house catches on fire. And these 20 minutes may save your family’s life.

When I talked to firemen they told me “20 minutes is a lifetime.” In California and some other states when you sell your home you have to have not only termite inspection but mold inspection too. Mold is a real problem to health and this problem has to be fixed.

We identified a whole range of frequencies related to mold, especially specific frequencies to safeguard and create a barrier against black mold. We included that information on our chip as well.

It is not only an insulation factor. It also has fire retardant properties, protects from mold and creates a sound barrier.
