

Love Your Heart?

At the rate we “enslave” ourselves to studies, work and business towards world class excellence, Singapore would soon top the chart to be among the highest in heart diseases and related fatalities. This is a premature loss to the family, company and national heritage. Men and women in growing numbers and even younger, are seeking help for more permanent answers to their challenges. Our research studies here are to share what others are experiencing for our learning.

By Peter Lim

Introduction

Heart attack and stroke could happen when calcium, fat, cholesterol, cellular waste and fibrin (a material involved in blood clotting) are deposited in the arteries. These are usually associated with high blood pressure and cholesterol (LDL), diabetes, smoking and age, and also caused by free radicals due to poor diet and heavy metal toxicity.

Embolic stroke occurs when blood clot or a piece of cholesterol or calcium deposits on the inside wall of the heart or artery breaks loose, and travels to lodge in a brain artery. When this happens, the flow of oxygen-rich blood to the brain is blocked and a stroke occurs. Cerebral hemorrhage occurs when a blood vessel in the brain ruptures and bleeds into the surrounding brain tissue, causing a stroke. Migraine headache includes the narrowing of the brain blood vessels. In some cases, thyroid disease can cause calcium build up (calcification) in the blood which results in unhealthy calcium plaques forming in the coronary arteries.

As poor blood circulation affects the organs, various health disorders could result including erectile dysfunction. Most people are not aware of their artery blocks. Strenuous exercise or running could lead to sudden collapse and potential death. Do brisk walking or moderate exercise instead. Seek help before it is too late with lifestyle changes.

Omega 3 from fish or flax oil is good for the heart, brain and eyes. For fish oil, most contain low percentage of Omega 3 with high levels of saturated oil that could even block the blood vessels over time. “Clear Passage Omega 88” from Nature’s Glory comes with up to 88 per cent of Omega 3, guaranteed at 85, with low saturated oil to promote a “clear passage”. It comes in veggie caps, easy to swallow with only 30 per cent of the usual capsule size, and no harmful impurities.

Case studies

▼ A man in his late forties had four artery by-pass two years ago. He had strokes two times within three years. He continues to have high blood pressure and cholesterol and under medications, suffering daily migraine since five years ago. He feels very tired, with stomach upset and acid reflux. Both parents and siblings have diabetes and strokes. I found he has very serious level of artery blocks. He has R1H2 virus attacking his cerebrum. After two minutes of testing with our smart, energy booster patches,

his organ energy levels were in harmony balance. He also needs energy stem cell therapy to help repair his brain, sex organs, kidneys and heart.

▼ A lady in her early fifties came with panicky stress for urgent help. Nine years ago she had a viral attack after a trip. She felt sick, giddy, tired with declining eyesight and was “healed” with medications after three years. One year ago, she started to repeat her experience with depressed anxiety and high cholesterol. Dad passed away due to heart attack while two other siblings had the same attack. I found she has high levels of artery blocks and diabetes, affecting her pancreas, liver and blood. Within a month of using the energy boosters, I was amazed by her progress.

▼ A lady in her fifties suffered a stroke last year. Her dad died of stroke. She felt dizzy, floating, lethargic and sleepy. I found she has high level of artery plaque and calcification, with H1N1 attacking her intestines and lymph nodes. This virus could attack her heart system. She also needs energy stem cell therapy to help restore her brain and heart systems.

▼ A man in his early sixties is under medication for his high blood pressure and diabetes. His organ energy levels were extreme. He was confirmed to be high in artery blocks but no trace of diabetes. Now in his third month of energy boosters, his energy levels are almost perfect within the first month.

▼ A foreign visitor in his mid seventies complained of trembling hands for the last two years. His doctor-brother could not detect his problem. For many years, he climbed many floors and carried heavy weights daily without a problem. I warned him of his high level of artery blocks. His trembling is due to the high levels of air-borne fungal spores in his intestines, thyroid, lungs and nose.

▼ A man in his mid thirties reported he had asthma, migraine, stiff neck, insomnia, back pain, failing eyes and skin disorders. He gets tired and falls sick easily, fatigue, and could not balance himself well. He is discovered to have parasite in his bladder/urinary, kidneys and heart, with artery blocks which he was not aware of. Within a month of using the energy boosters, his organ levels are almost harmonised including his heart.

At Nature’s Glory, we give comprehensive counseling on a holistic approach including changes to lifestyles, and monitor the monthly performances till we are satisfied.
