

Sleep Disorders, Mental Stress & Depression

By Peter Lim

Are you among the growing number of sufferers for many years and without end? Whatever your health challenges, we believe we have most of the answers through energy to help you!

Understanding diseases

Recognising that over 90 per cent of diseases are due to pathogens of bacteria, fungi, viruses, parasites, toxins or tumours is the key to deal with these challenges. Nearly 100 per cent of cancer is mainly due to toxins and pathogens. Each of these has energy level to weaken our cellular energy and immune system. Identifying the correct frequency helps boost the immune system to overcome their presence. The complementary and innovative therapy of **NeB** over a 20-year research helps to identify these challenges, giving hope to hopeless and countless cases.

Sleep disorders, mental stress, anxiety and depression

A 60-year-old Korean lady suffered for seven years. She had pain all over, depending on mental pills. Recently she was hospitalised for eight weeks in Korea. We analysed her photo and found high levels of fungus in her brain and lungs that caused her sleep disorders, leading to body breakdown, anxiety and depression. She had environmental toxins in her intestines. Within a week of using our **NeB** patch programmes, she recovered and asked for a discharge. She stopped all her seven year medications. Within a month, she is enjoying life with nature to the fullest with good appetite. Her pain is gone!

Our research showed the presence of bacteria, fungi, viruses or parasites in the brain, ears, bones and body that could also cause stress, pain, memory loss, and diseases. A number of females came to me with unexplained body changes in their later years and only to discover they have autistic virus in their brains. All have found good success with **NeB**.

Autism

Most autistic children and adults could not find a breakthrough answer. A 44-year-old mother with three seven-year-old children sought help. After an anti-viral injection when they were two years old, the eldest behaved "in his own world". I tested his energy levels and confirmed he has mild autism. But the other two children were even worst. The mother was tested to have R1H2 virus

in the uterus which infected the brains of the unborn babies. I tracked the root to the grandfather who could be the most likely cause. If left untreated, the next generation would most certainly have the same challenge.

For twelve years another mother was searching to help her 14-year-old boy, but found no breakthrough. Within two months of using **NeB**, she used a brain scan to confirm my findings that the brain has dramatically improved. With **NeB**, it takes up to six months to remove the virus from the brain and womb, and up to two years to repair the brain cells. Our **Brain Stem** patch may help quicken the recovery and help those with brain damage, dementia and Parkinson's disease.

Psoriasis & eczema

A 48-year-old Australian resident suffers from serious psoriasis for five years. My tests and photo confirmed the root cause as fungal. Within one month of using **NeB**, 80 per cent progress was noted and he sent pictures to support (see above). There is hope for eczema sufferers as this is easier to help than psoriasis.

Parasites

A 40-year-old Myanmar resident here had 2 pregnancies aborted. She badly needs a child. As found in other cases, she has high level of parasites in the womb that must be rid off that could have affected the unborn child. Our **Sex Organ Stem Cell** helps repair the cells. Another mother of 37 wanted a third child. After taking remedial actions for the third time and confirming with the photo results, she is ready for a potentially healthy child!

My grandchildren used to be sick and even hospitalised for various reasons. Their unbelieving parents eventually used **NeB** to effectively neutralise and build up the immune systems.

Herpes, EB Virus & hepatitis

A 54-year-old visiting Japanese denied that he has herpes after my test. On reflection, he admitted he had herpes 30 years ago. I told him it is in his brain and spinal cord and the photo proved it.

80% Result For Psoriasis With **NeB**
(within one month)

Before

After

A 40-year-old Austrian resident here has sleep disorders, night sweating, memory loss and pain. I tested him for herpes and the photo confirmed it. If left untreated, this could lead to cervical cancer for the partner.

A 33-year-old Indonesian resident here was tested to have EB virus that could lead to nose cancer. He did not know but complained about migraine and body pain. EB virus is high in his brain!

A 51-year-old has multiple health challenges including a high level of hepatitis B virus.

Heart attacks & strokes

A 62-year-old friend was tested to have high levels of arterial plaques and calcifications. He had stroke eight years ago. He could face the same or have a heart attack within six months if remedial actions are not timely.

A 54-year-old Indonesian was tested to have high levels of diabetic virus and fibrin in his bone marrow, pancreas and eyes. **NeB** could predict diabetic conditions many years ahead!

In these days, growing numbers are seeking **NeB** with very good and positive results. The secret lies in using the right energy to boost the immune system to do its functions, and usually achievable within three to four months. Share these discoveries with your friends to come forward. It could be the last resort!
